Powered Parachute Flight History 2015–2026

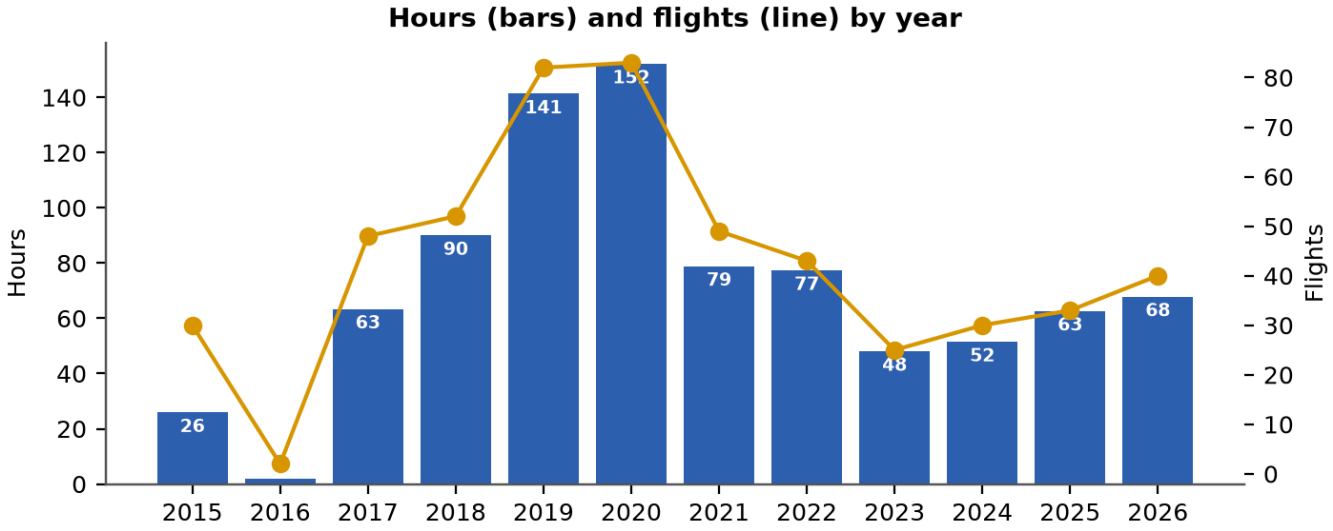

Indiana · 517 flights · 861 hours · 22,853 miles

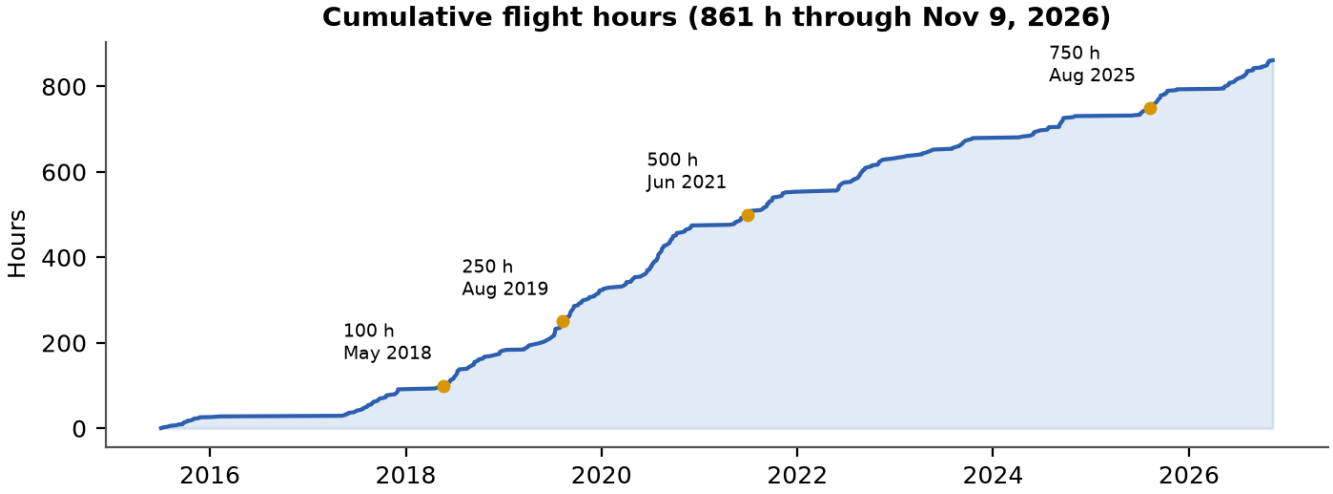

517 FLIGHTS 471 with GPS tracks	**861.3 h** TOTAL HOURS since July 2015	**22,853 mi** DISTANCE FLOWN statute miles	**1.67 h** AVERAGE FLIGHT 45 miles
9 AIRCRAFT FLOWN 6 makes and models	**20+** AIRPORTS AND FIELDS 23 in the logbook	**68** PASSENGER FLIGHTS 37 different people	**102.4 mi** LONGEST FLIGHT 2 h 58 min, Aug 4, 2026

Built from GPS track logs, the pilot logbook, and 2026 engine-monitor data. Each flight is counted once. Times are Eastern; distances are statute miles; altitudes are feet. Data through November 9, 2026.

Lifetime totals

Over eleven seasons: **517 flights, 861.3 hours and 22,853 miles**, an average flight of 1.67 h and 45 miles. 471 flights have a GPS track.

Yearly summary

Hours come from the pilot logbook and GPS or engine-monitor track times. Miles come from GPS tracks (engine monitor for 2026) and logbook distances. Averages use the flights that have a value.

Year	Flights	Total hours	Longest flight (h)	Average flight (h)	Total miles	Avg miles / flight	Max single flight (mi)
2015	30	25.9	2.3	0.86	442	22.1	57.0

Year-by-year highlights

- 2015: training at Mount Comfort (KMQJ) in a Skytrails Predator and the Buckeye Dream Machine #2; first solo Sep 5; 12.4 h dual received.
- 2016: just 2 flights, then the longest break on record (457 days, to May 8, 2017).
- 2017: back flying in May with an Apco Cruiser wing; Sport Pilot checkride Aug 9 at Kankakee, IL.
- 2018: passed 100 hours; most landings of any year (140).
- 2019: 82 flights and 141 h; trips to Mentone; first flights from 73II near Nulltown; 6-day streak.
- 2020: busiest year, 83 flights and 152 h, including 21 flights in July.
- 2021: passed 500 hours; flew two other Powrachute Airwolfs.
- 2022: northern Indiana tour on May 28 (Rochester, Marshall Co.).
- 2023: 25 flights averaging 1.9 h.
- 2024: 30 flights, 12 of them in September.
- 2025: first Ohio trip (Alderman, St. Clairsville) Aug 1–2; passed 750 hours; morning flight to Flat Rock Aug 9.
- 2026: started flying the Powrachute Airwolf #1 in May; Apco Voyager wing from Aug 28; record 178-minute, 102-mile flight Aug 4.

Shelbyville Municipal Airport	KGEZ	2017–2026

Launch points are grouped within 1 mile and labeled by airport code where there is one.

Patterns

About 70% of flights are evening flights, 22% are in the morning, and only 8% are midday. Fall is almost as busy as summer thanks to harvest photo flights, and weekdays see nearly as much flying as weekends.

Flights with video

Scott's YouTube channel (youtube.com/c/scottrichardsonppc) has 356 public videos. 313 of them are matched to 282 flights in this history. Each video was matched by the date in its title or description, then its upload date, place names and airport codes, and morning or evening hints on days with more than one flight. **High** means a dated title with one clear flight; **medium** means the date is clear but the leg on a busy day is a judgment call; **low** means an undated video matched by upload date and is a best guess.

A few videos about home are left out of this list.

About the data

- Flights were taken from GPS track logs, with driving and ground handling removed and duplicate files counted once.
- Hours and miles combine the pilot logbook, GPS tracks and 2026 engine-monitor data, so each flight appears once.
